

Assignment 1: Descending a ladder in the time

Individual reflection

- When do you want to defend? This is your end goal.
- If this is your end goal, when should your manuscript be ready for approval?
- Focus on your current projects; if your manuscript should be ready for approval on (date), what phases (high level steps or clusters of tasks) can you distinguish per project, that still have to be completed?
- Looking at the coming 3 months: what milestones do you see connected to these phases?
- Is it possible to break the phases in smaller, concrete tasks or activities?
- What other tasks or activities are part of your contract, for example do you teach or supervise students, anything else?
